OBJECTIVE

Motivated Computer Science student seeking an opportunity to apply my knowledge, learn new technologies, and gain hands-on experience. I am eager to grow in a professional environment and contribute positively to the organization.

SKILLS

✓ **Primary Skills:** Python, SQL, HTML, CSS, Servicenow

Secondary Skills	Type	Expertise
Figma	Tech	Intermediate
Team Work	Non-Tech	Intermediate
Time Management	Non-Tech	Intermediate
Adaptability and Learning Attitude	Non-Tech	Intermediate

EDUCATION

Degree	Institution	Branch	% / CGPA	Year
BE	Mysuru Royal Institute of Technology Mandya	CS	8.49	2026
12th	JSS PU College For Women Mysuru	PCMB	78	2022
10th	Sri Vivekananda High School Hanur	—	81.92	2020

PROJECTS

Final Year

Project Title: Detection of Malicious Bots on X (Twitter) Network

Description: Developed a machine learning-based system to identify malicious or automated accounts on the X (Twitter) platform using tweet URLs and text analysis. The system analyzes textual content and link patterns to identify suspicious or automated accounts, improving detection accuracy and online security.

Technologies Used: Python, Flask, SVM, MySQL, HTML, CSS, JavaScript

Key Features: Checks tweet URL and text, Finds suspicious activity, Uses ML to detect bots, Shows result on website, Processes data before prediction

Internship

Project Title: CampusATdesk

Description: Developed a campus recruitment web application that connects students, recruiters, and administrators on a single platform. The system allows students to apply for jobs, recruiters to post job openings, and admins to manage users, companies, and job categories efficiently.

Technologies Used: Python, Flask, MySQL, HTML, CSS, JavaScript

Key Features: Student dashboard for job search and applications, Recruiter panel to post and manage job listings, Admin dashboard for managing users, companies, and categories, Job application tracking system, Role-based authentication and access control

Mini Project

Project Title: Feedback Management System

Description: Developed a web-based application to collect and manage user feedback. The system allows users to submit their name, email, and feedback message, which are securely stored in a MySQL database. It helps in efficiently collecting and organizing user opinions.

Technologies Used: Python, Flask, MySQL, HTML, CSS, JavaScript

Key Features: Add and store user feedback, Form validation for required fields, Flash messages for success and error handling, Responsive and user-friendly interface, Database integration using MySQL

CERTIFICATES

Secondary: Become HTML Hero, CSS Complete Course For Beginners

HOBBIES & INTERESTS

Watching movies, Listening to music
