## CAREER OBJECTIVE

---

Motivated Computer Science student seeking an opportunity to apply my knowledge, learn new technologies, and gain hands-on experience. I am eager to grow in a professional environment and contribute positively to the organization.

## SKILLS

---

|                        |                                                            |
|------------------------|------------------------------------------------------------|
| Backend Languages      | Python, Java                                               |
| Frontend Languages     | HTML5, CSS3                                                |
| Database               | MySQL                                                      |
| Version Control System | Git, GitHub                                                |
| Soft Skills            | Time Management, Adaptability, Teamwork, and Collaboration |

## EDUCATION

---

|                                                                                                          |                     |
|----------------------------------------------------------------------------------------------------------|---------------------|
| <b>Mysuru Royal Institute of Technology Mandya</b>                                                       | Dec 2022 - Jun 2026 |
| Bachelor of Engineering in Computer Science and Engineering - CGPA: 8.49 (till 7 <sup>th</sup> semester) |                     |

## INTERNSHIP

---

### Software Developer Intern – Thought Process Systems LLP

- Developing web-based application features to enhance user experience
- Implementing user registration system and managing database operations for multiple users
- Gaining hands-on experience in full-stack development using real-time projects
- Working with Python, MySQL, HTML, and CSS to build scalable applications
- Debugging and optimizing code to improve application performance and reliability

## CERTIFICATIONS

---

- Become HTML Hero
- CSS Complete Course for Beginners
- Java Foundations: Mastering the Basics

## PROJECTS

---

### Farmer Management System

- The system enables farmers to showcase and sell their products online, reaching customers beyond local boundaries.
- It reduces dependency on middlemen, allowing farmers to earn fair prices for their produce.
- It supports online payments, order tracking, and delivery management for smooth transactions.
- Farmers can display detailed product information and promote their produce, building a strong customer base.

### Detection of Malicious Bots on the 'X'(Twitter) Network

- Designed an intelligent system to identify malicious Twitter (X) bot accounts using machine learning techniques.
- Cleaned and prepared large tweet datasets to improve the accuracy and reliability of predictions.
- Trained and tested an SVM-based classification model to distinguish automated bots from genuine users.
- Created a user-friendly web application that allows users to check accounts and view detection results instantly.

## POSITION OF RESPONSIBILITY

---

### Hackathon Coordinator

- Organized and managed hackathons, handling registrations, logistics, and participant communication.
- Coordinated with mentors and judges to ensure smooth event execution and project evaluation.

## HOBBIES AND INTERESTS

---

- Watching Movies
- Listening to Music
